YSOFT SAFEQ CLOUD **ELIMINATES THE COMPLEXITY**

SAFEQ Cloud takes the pressure off IT – by removing the reliance on print servers, enabling central management, and by virtually eliminating common IT helpdesk pain points, and making office print a breeze for everyone printing.

Quickly and seamlessly move your print infrastructure to the cloud with an architecture setup that facilitates your needs wherever you are in your cloud journey

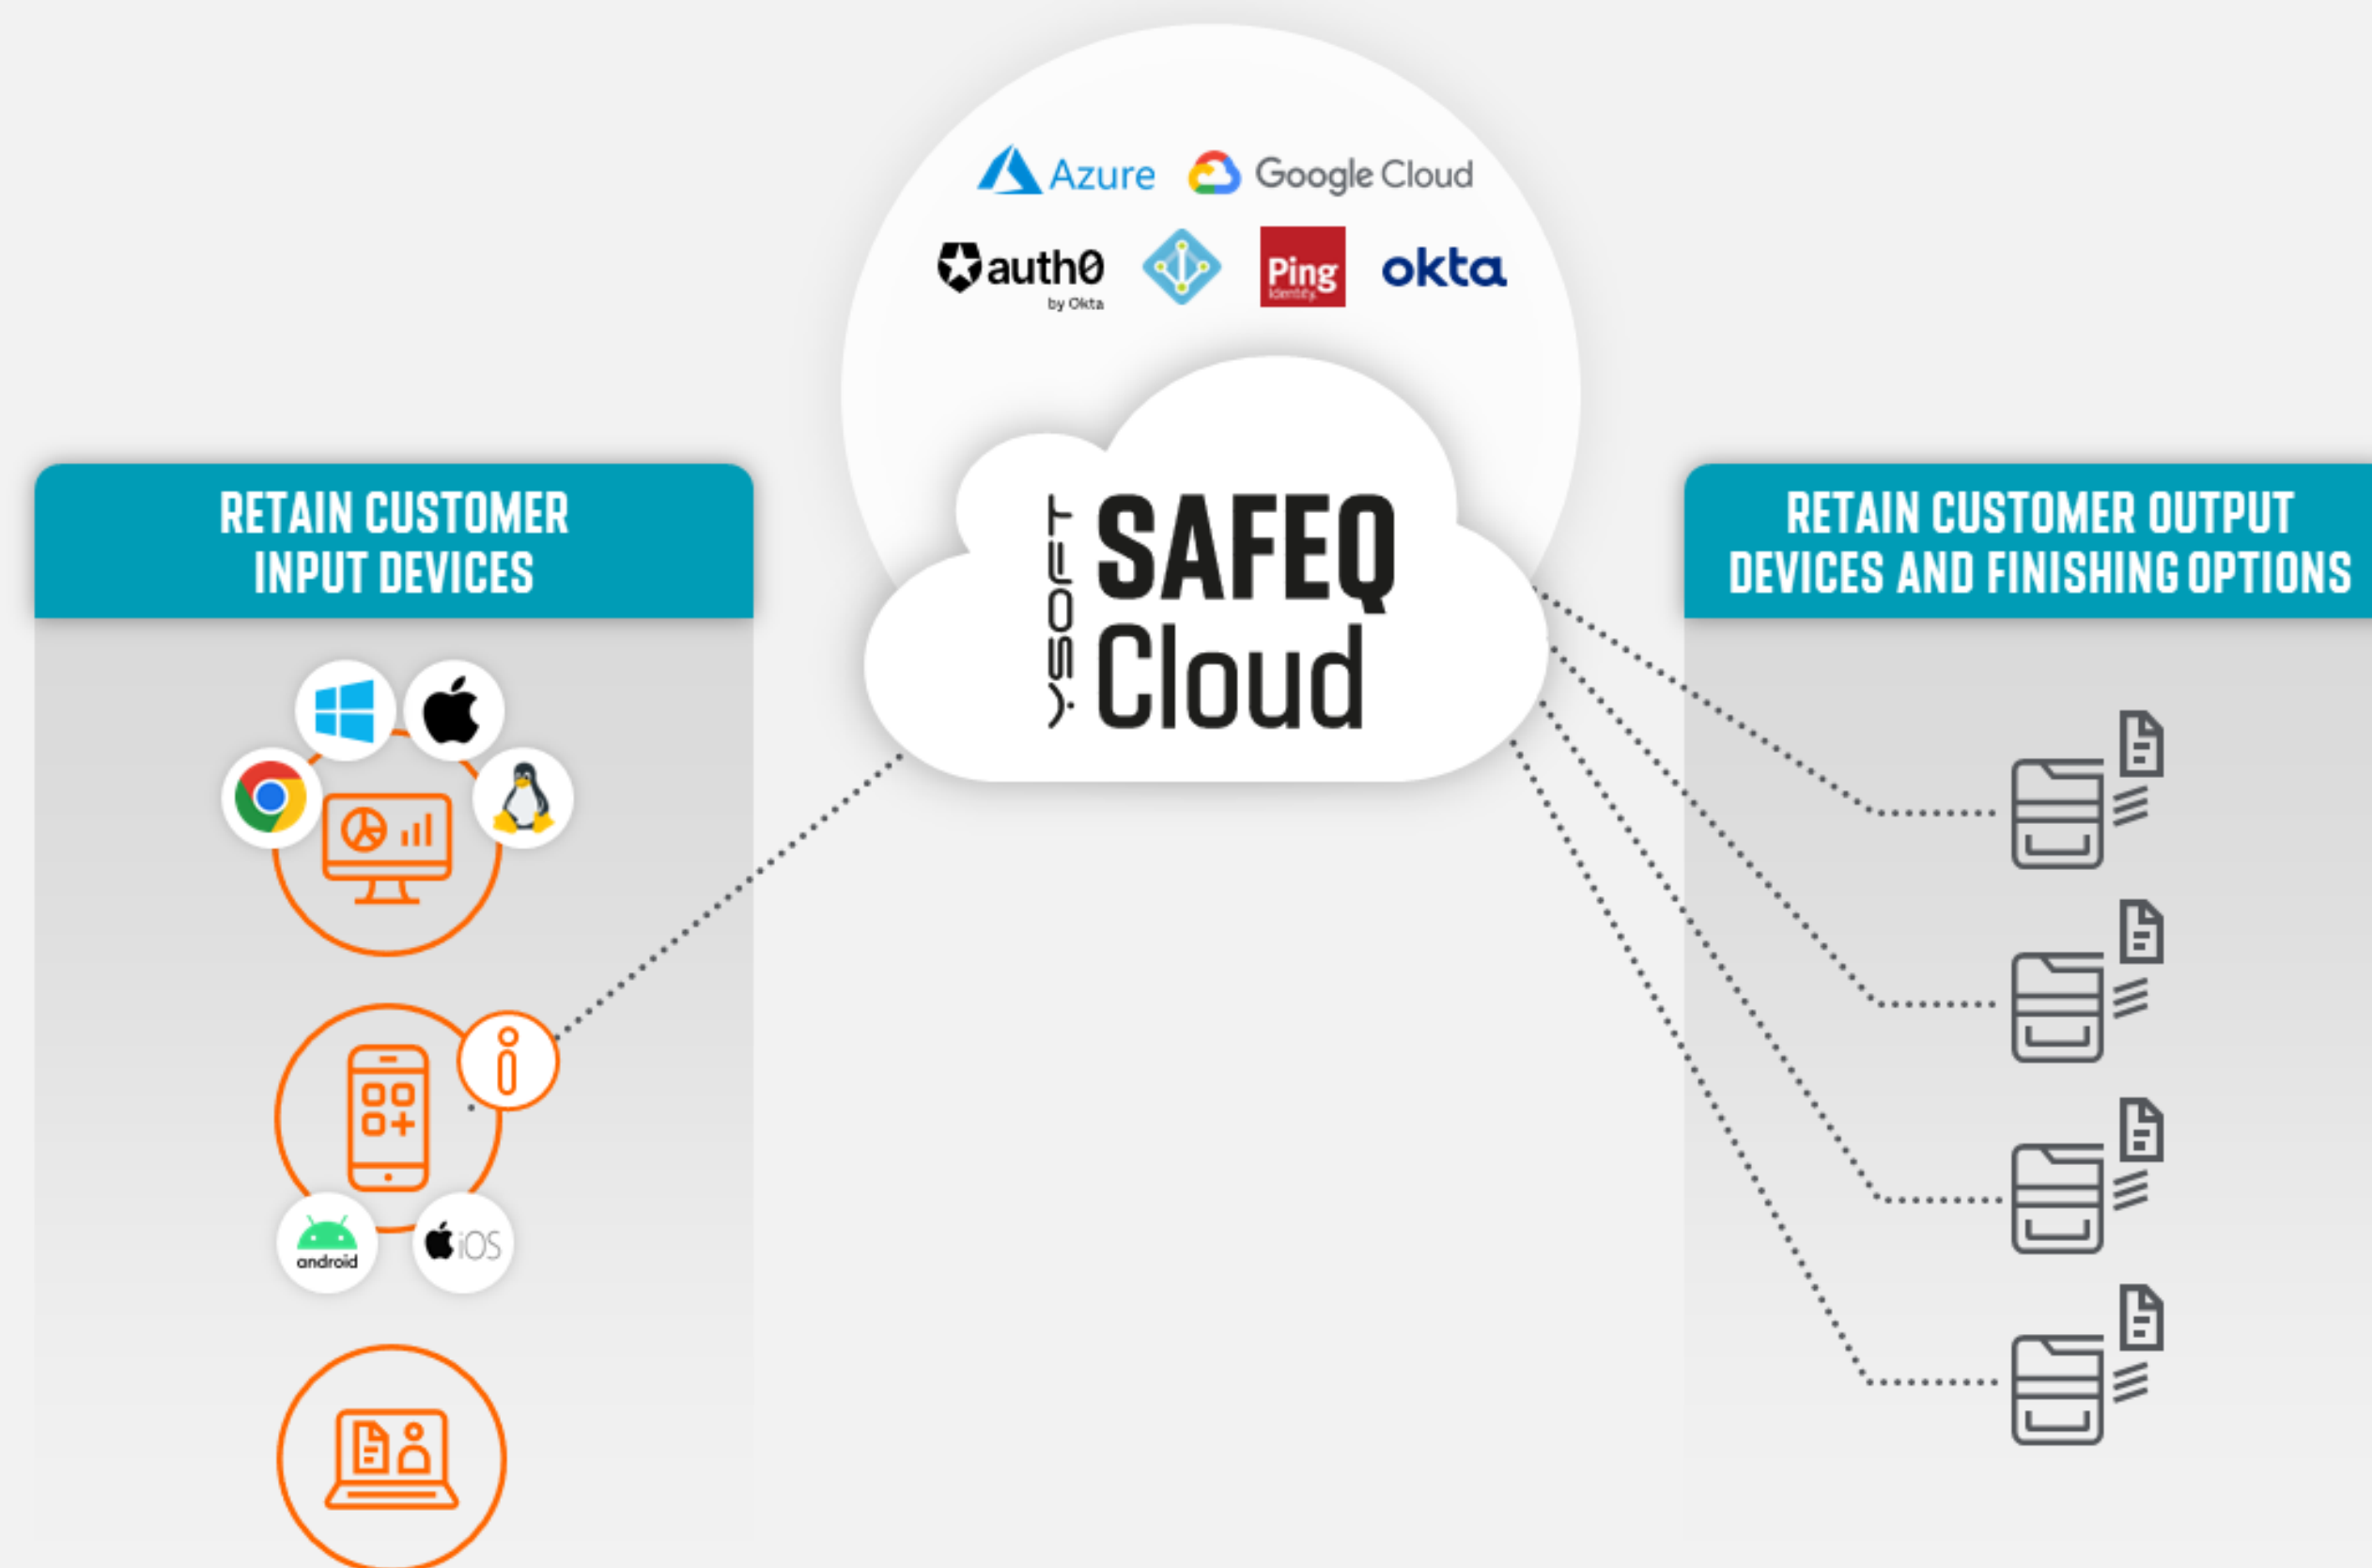

Make your IT infrastructure **secure and resilient** to withstand vulnerabilities and uncertain times

Provide flexibility to your users by enabling them to easily print from any device at any location, to any printer, in a matter of seconds – without needing IT support

Liberate your IT team from print management, so they can focus on your core business

REAP THE BENEFITS OF YSOFT SAFEQ CLOUD – YOUR WAY

- 1 Enjoy cloud printing, your way 
- 2 Reduce your cost with serverless printing 
- 3 Control costs and easily scale with our subscription-based model 
- 4 Enhance your IT team experience with a full-featured print driver 
- 5 Stay on top of upgrades 

REAP THE BENEFITS OF **YSOFT SAFEQ CLOUD** – YOUR WAY

- 6 Hassle-free printing for users +
- 7 Improve productivity with location-aware printing +
- 8 Automate IT work +
- 9 Personalise your experience with our multi-tenant platform +
- 10 Supercharge your security and protect your data +

REAP THE BENEFITS OF YSOFT SAFEQ CLOUD – YOUR WAY

1 Enjoy Cloud printing, your way

SAFEQ Cloud can be configured to meet your current business model and be scaled to adapt to your future cloud aspiration and growth strategies.

2 Reduce your cost with serverless printing

Reduce the cost and complexity associated with a traditional print environment. SAFEQ Cloud lessens the burden on IT, removes the reliance on print servers, enables central management, and virtually eliminates common IT helpdesk pain points.

4 Enhance your IT team experience with a full-featured print driver

5 Stay on top of upgrades

REAP THE BENEFITS OF YSOFT SAFEQ CLOUD – YOUR WAY

1 Enjoy Cloud printing your way +

3 Control costs and scale with subscription-based model

With SAFEQ Cloud, there is no upfront investment. Our subscription-based model gives you the flexibility you need to scale your consumption up and down according to business needs. Simply pay for the licenses you need.

4 Enhance your IT team experience with a full-featured print driver

SAFEQ Cloud's full-featured single driver, unlike universal print drivers, is designed to work across all models and brands. Once a user authenticates themselves at a device, SAFEQ Cloud formats the job, including all finishing options, and seamlessly sends it to a chosen printer (regardless of brand).

4 Enhance your IT team experience
with a full-featured print driver +

5 Stay on top of upgrades +

REAP THE BENEFITS OF YSOFT SAFEQ CLOUD – YOUR WAY

5 Stay on top of upgrades

SAFEQ Cloud is a cloud-based infrastructure non-reliant on servers, enabling ongoing optimization of the print fleet, by delivering services as close as possible to end-users and eliminating the cost and complexity of manually monitoring, managing, and updating dedicated print servers.

Migrating print to the cloud makes managing updates much sleeker. During changes to the platform, end-users automatically retrieve the updates from the cloud – rather than needing to push updates with group policies.

6 Hassle-free printing for users

Users (and guests) can easily print from any device to any location, in a matter of seconds. Pull printing lets them submit print jobs from their laptop, mobile, or tablet. These print jobs are held in a secure queue until the user authenticates at any device, using PIN code, swipe card, or QR code to release the documents. This minimizes the risk of confidential data falling into the wrong hands or non-vital print jobs getting printed.

SAFEQ Cloud delivers one global print queue that connects every printer, every user, and every office across your organization, enabling seamless printing without IT intervention.

10 Supercharge your security and protect your data

REAP THE BENEFITS OF YSOFT SAFEQ CLOUD – YOUR WAY

7 Improve productivity with location-aware printing

A simple but game-changing enhancement to direct printing is location-awareness. Users have access to printers without having to install devices or drivers. Available printers are automatically displayed and those no longer available are automatically removed. This allows users to print immediately, wherever they are, without having to call IT for support.

9 Personalise your experience with our multi-tenant platform +

10 Supercharge your security and protect your data +

8 Automate IT work

Enjoy hassle-free printing, with immediate end-user fulfilment and device provisioning. SAFEQ Cloud makes it easy to deploy and control the entire print infrastructure from a single web-based interface.

We support all operating systems available to users (Apple, Google or Microsoft), while ensuring a consistent end-user experience. Once you've switched users over to cloud print, they can submit jobs in the same way they always have i.e., click print or hit ctrl/command+P.

9

Personalize your experience with our multi-tenant platform

Multi-tenancy is a cost-effective, highly efficient, low maintenance cloud solution that allows multiple clients to share the same cloud resource and architecture.

The multi-tenant (born in the cloud) nature of SAFEQ Cloud allows for seamless and personalized cloud experiences and availability across an entire organization—with easy setup and global implementation of updates (with no additional costs or downtime).

10

Supercharge your security and protect your data

SAFEQ Cloud is designed for Zero Trust requirements. Protect your data with features including end-to-end server-to-hardware encryption, user authentication, auditing functionality, and integration with cloud-based authentication providers like Okta, Azure AD, and Google. SAFEQ Cloud provides the strongest available security between endpoints.

YSOFT SAFEQ CLOUD KEY FEATURES

Infrastructure

- Serverless print environment
- Converged document-handling infrastructure with global control from one web-based user interface
- Dynamic releases for non-stop innovation

Reserved infrastructure – Data resides in a dedicated environment, enhancing control over regulatory compliance and ensuring robust data protection.

Mobile and guest printing

Intuitive mobile printing for users and guests. Use the YSoft SAFEQ application to submit and release print jobs at any location and with any device.

- BYOD friendly
- Supports iOS, Android, and Windows devices
- Unified authentication experience
- Identity validation and admin control for guest accounts
- Mobile device management

Driver management

Full-featured single driver including all finishing options such as duplex, booklets, staple, punch, etc., to manage multi-brand fleet

Embedded clients

Authentication and secure print at MFP

Authentication

Username+Password
Card
PIN/User ID
Self-Registration
Scan QR code with your mobile device

Support on-premises IAM: Microsoft Entra ID, LDAP
Support Cloud IAM: Auth0, EntraID, Google workspace, Okta, Ping

Multi-vendor scanning

Simple 3-step multi-vendor scanning (capture, process, deliver) in one touch

Location-aware

Pure cloud terminals

SAFEQ Cloud's pure cloud terminals support multi-brand printing and scanning, providing businesses with a streamlined and secure printing solution with both print and scan capacities available from the same user interface.

Zero-management platform

These are the capabilities that ensure you don't have to manage print:

- Reporting (Ready-made templates)
- Print Roaming (Automatic pull printing)
- Mobile print (Easy access to print for mobile users)
- Rule based engine (Takes care of the desired workflow for you)
- Client auto-update

ENABLE DIGITIZATION WITH SCANNING EXPERIENCES IN THE CLOUD

Digital transformation is in full effect, especially in the world of document capture and workflow digitization. Organizations are looking to collaborate more and organize data easier, and thanks to our Pure Cloud Terminals, both are possible with SAFEQ Cloud's Multi-Vendor Scanning.

Scan-to capabilities 

OCR capabilities 

Advanced capabilities 

Scan-to capabilities

Benefits:

- Simple one-touch multi-vendor scanning
- Efficiently scan to email or cloud repositories
- Configure workflows to capture, send, and store
- Securely transfer documents and metadata to a HTTPS endpoint

Features:

- Scan to email (no need to download PDFs first)
- Scan to 3rd party repositories (OneDrive, SharePoint, Google Drive)
- Scan to HTTPS connector

OCR capabilities

Benefits:

- At the touch of a button, convert physical documents into searchable, editable digital files.
- Extract text from scanned documents in over +200 languages with a world-class OCR engine

Features:

- Searchable PDF
- Barcode Recognition
- Highlighted text redaction
- Output formats: Text file, Microsoft - Word, Excel, PPTX, RTF, TXT

Advanced capabilities

Benefits:

- Make high search efficiency the new standard
- Improve searchability, organization, collaboration, compliance, and decision-making

Features:

- De-speckle
- Append & Pre-pend pages
- Document indexing
- Black page removal
- Document separation
- Password protected PDFs

SUBMIT AND RELEASE PRINT JOBS ON YOUR PORTABLE DEVICES

Get access to printers from your back pocket. The YSoft SAFEQ app enables secure job submission and release for any solution in the SAFEQ portfolio. It's a simple solution to connect mobile users and guests to your print ecosystem. The application is available for iOS and Android devices.

Intuitive mobile printing for roaming users

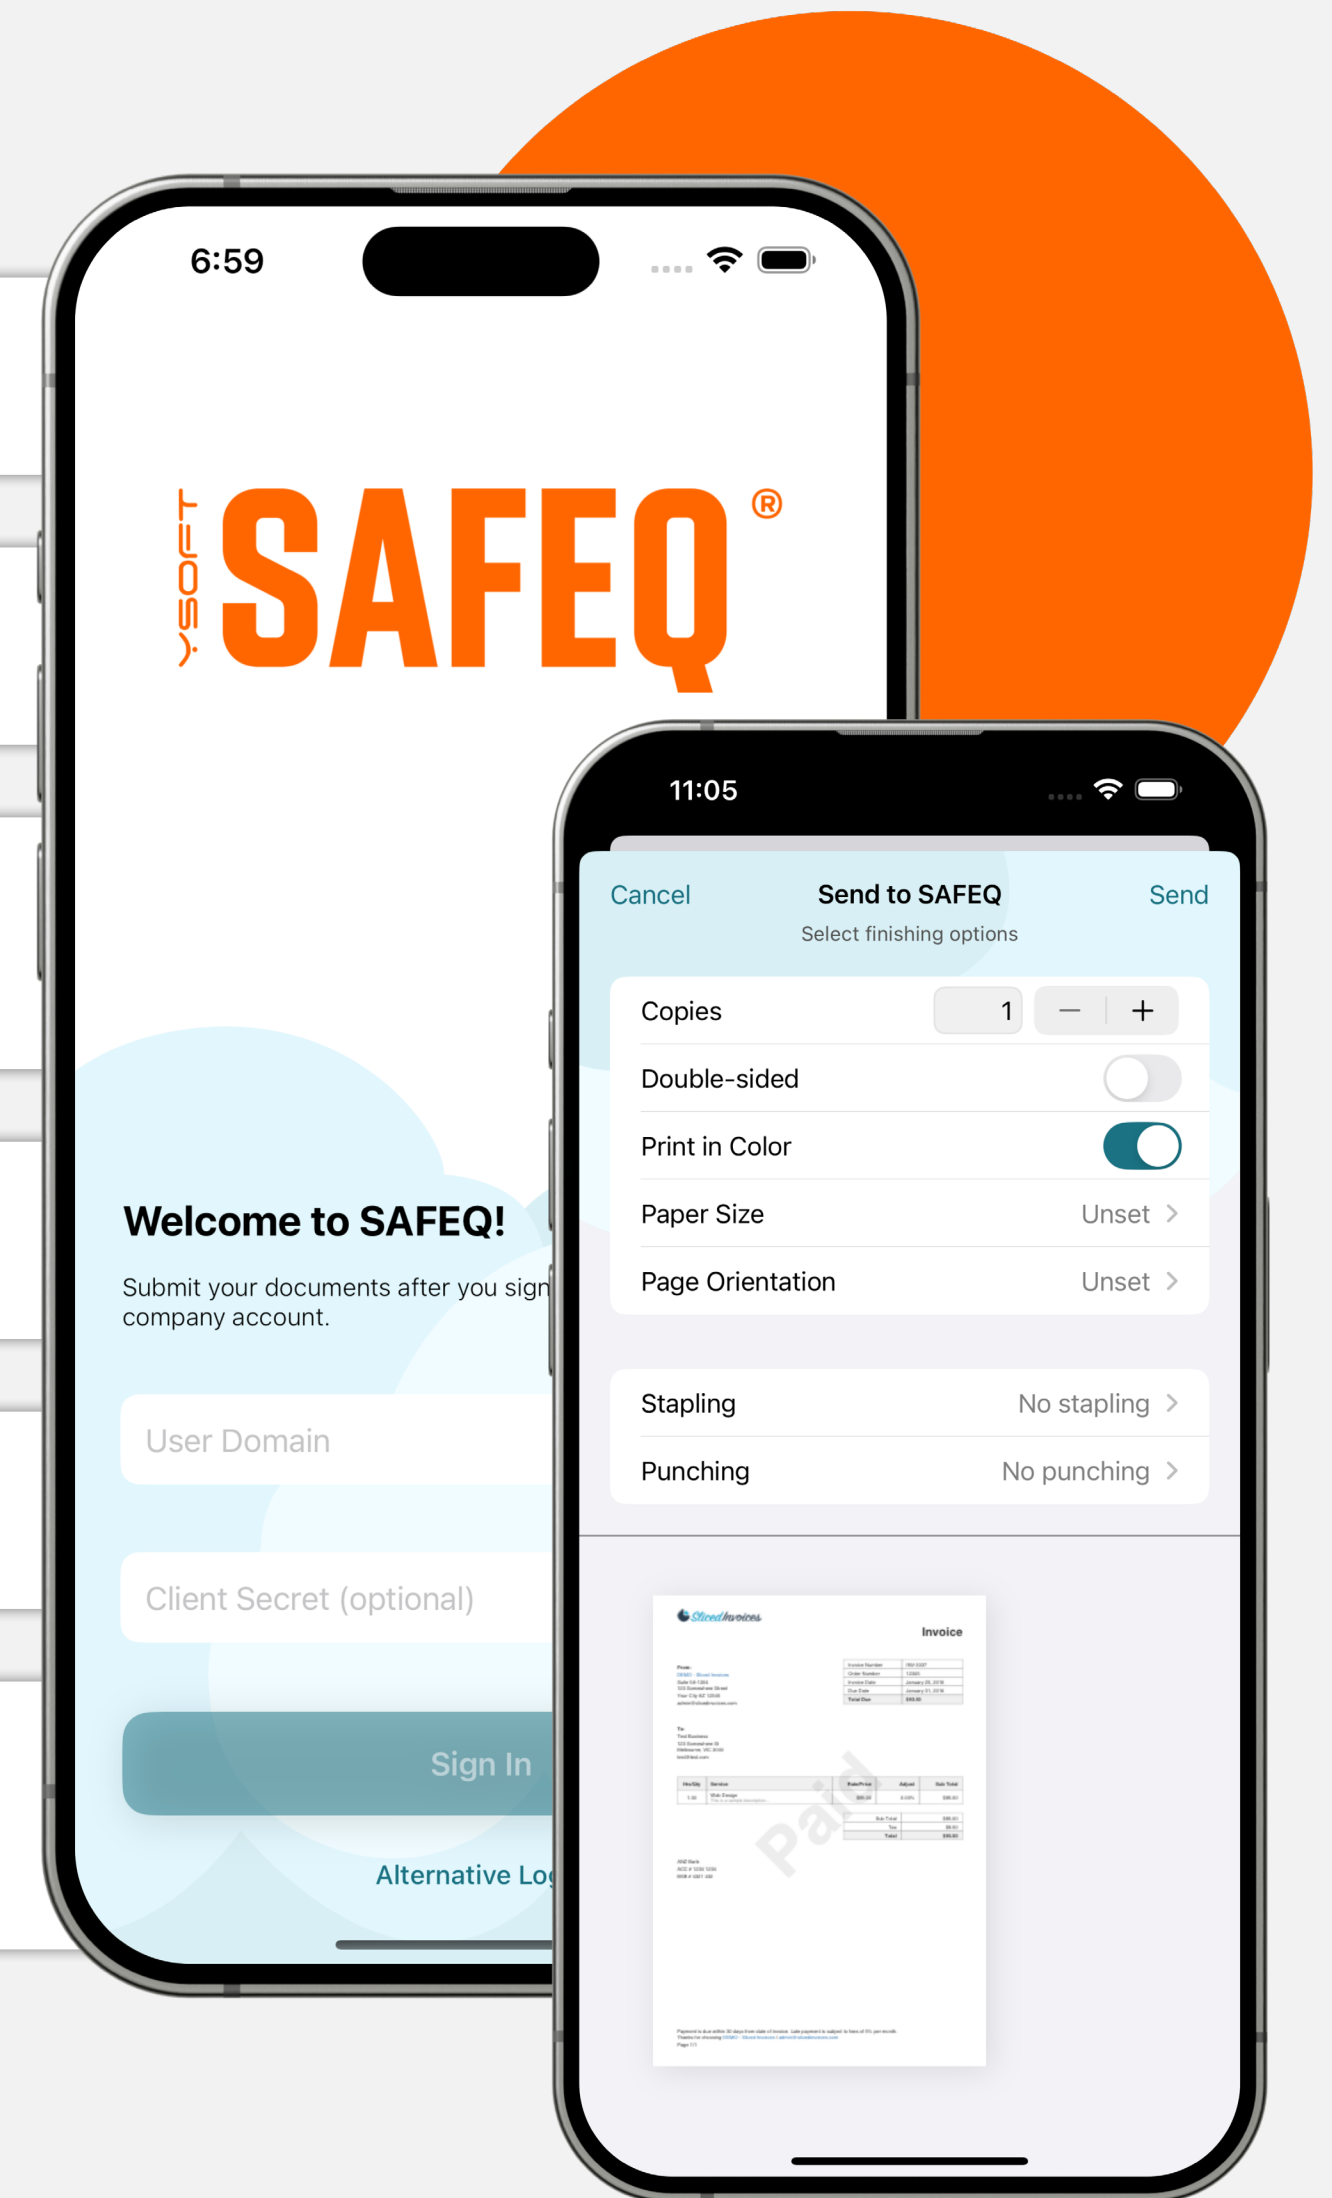

Controlled guest access to print capabilities

QR code scanning for a pre-configured app and QR code print release

Finishing options on submission and release

Secure printing aligned with zero-trust goals

Easy document search on your device, OneDrive, Google Drive, and Dropbox

EVEN LEGACY ENVIRONMENTS HAVE A PLACE IN THE CLOUD

YSoft OMNI Bridge® and its distributed architecture helps you hook up legacy print environments to SAFEQ Cloud. This edge device eliminates the cost and management of Secondary Gateways while allowing for the remote deployment of embedded apps for non-cloud native terminals. In other words, OMNI Bridge is your designated cloud-connector.

-  Deploy and enjoy with a simple 3-step installation
-  Easy delivery of print jobs from the cloud
-  Connection to on-prem authentication services (Active Directory or LDAP)
-  Ensures high availability, network resilience, and seamless printing
-  6-year warranty package

Y SOFT HELPS BUSINESSES & THEIR PEOPLE BUILD BETTER WAYS OF WORKING

With a market-leading product portfolio, advanced security, and a fierce commitment to innovate, **we bring next-level office solutions** that are cheaper than mental healthcare for IT Teams everywhere.

Y Soft is a global organization that develops intelligent next-gen office solutions for enterprises, SMBs, and education. Founded in 2000, the company is headquartered in Brno, Czech Republic, with offices in NALA, EMEA and APAC regions.

By simplifying and automating everyday work, Y Soft clears the path for businesses and employees to focus on what matters
